

TECHNICAL DATA SHEET

Location: Bergamo

Year: 2014

Client: CMR (BG)

Architectural Design: arch. Gritti –(BG)

Membrane Design: Canobbio Spa

Area: 640 m²

Fabric: PES/PVC mesh

Type: textile façade

DESCRIPTION

Scope of the project was to create a main entrance for a nursing home.

The use of textile for façades is becoming more and more popular as it grants a different appearance to structures which may not be nice to see.

It also allows a quick manufacturing and the possibility to change panels and colours quite easily if desired.

Textile façades are an elegant and simple solution which overcome the limits to which membrane textile structures seemed to be destined.
